4. A 28.7-percent increase in mechanized loading at faces in mines in slightly dipping and dipping coal seams in the Stalinugol' Combine as a result of stepping up the productivity of coal-mining combines and introducing more of them.

5. Completion of the plan for capital construction by December.

6. Completion of the plan for housing and for cultural and public building construction by 5 December and putting into use 47,800 square meters of housing, in the case of the Stalinugol' Combine, and 23,500 square meters, in the case of the Artemugol' Combine. In addition, putting into use 20 cultural and public buildings, in the case of the Stalinugol' Combine, and six, in the case of the Artemugol' Combine.

7. Reduction in production costs of coal and products of branch enterprises and above-plan accumulation in the amount of 3 million rubles, in the case of the Stalinugol' Combine, and 2 million rubles, in the case of the Artemugol' Combine.

8. Assurance of further improvement in the quality of the coal mined.

The Stalinshakhtostroy Combine makes the following pledges for 1952:

1. Completion of the 1952 plan for construction and installation work by 21 December.
2. Completion of the plan for putting into use housing and cultural and public buildings by 5 December.
3. Increase of 9 percent in labor productivity above the level achieved in 1951.
4. Reduction in production costs and delivery during 1952 of 10 million rubles in above-plan accumulations.

TKIBULI MINERS CHALLENGE MINERS OF TKVARCHELI -- Tbilisi, Zarya Vostoka, 31 Jan 52

In an open letter addressed to all miners in coal regions of the Georgian SSR, coal miners of Tkibuli challenge miners of Tkvarcheli to competition and appeal to all miners of the republic to complete the 1952 plan ahead of schedule. For themselves, the Tkibuli miners make the following pledges:

1. Delivery of tens of thousands of tons of coal above the 1952 plan.
2. Introduction of the hydraulic backfilling method, already used in the Mine imeni Stalin, into the mines imeni Lenin and Molotov, thereby reducing coal losses considerably.
3. Reduction in production costs of coal and delivery to the state of one million rubles in profits as a result of the economical consumption of materials and the carrying out of various technical measures.
4. A 3-percent above-plan increase in labor productivity.
